A BUSINESS MAN'S REFERENDUM

ONE of the interesting things about the fight for control in the directorate of the P. R. T.—which is, in fact, a conflict between ancient and modern theories of industrial management and relationship—is the state of mind which has revealed in rich and well-to-do men of various sorts who have thrown their influence and their pockets to the side of Mitten, co-operative management and the bonus plan.

WORK FOR PRISONERS

DR. JOHN M. BALDY, head of the new State Department of Welfare, broadly implied in a recent address that an effort will be made under his direction to revise the laws which inflict continued idleness on a majority of prisoners in Pennsylvania jails.

ANOTHER OF THE SAME KIND

ONE of the reasons for Senator Kenyon's affiliation with the farmers' bloc may be found in the attitude toward the farmers of Charles A. Rawson, whom Governor Kendall, of Iowa, has appointed as Kenyon's successor.

ROOTS OF THE TROUBLE

EVEN a casual survey of the current report of essential food prices should be sufficient to indicate the cause of industrial friction and unrest. Food of the sort which every family has to buy to live is still 44 per cent more costly than it was in 1918.

THE ETERNAL RIDDLE

TWO women on the jury stood for the first in favor of conviction. So was a significant sentence in the news dispatch from Norrisston which told on Saturday of the verdict of guilty rendered against Evans and Yeakle, trainmen who were in court under charges of criminal negligence which grew out of the wreck of their train at Bryn Athyn on December 5 and the death of twenty-seven persons.

acting work. It depends largely on the personal equation. No device ever invented can make railway trains safe if the crew is incompetent or negligent.

AN ATTEMPT TO COMBINE SOCIAL OIL AND WATER

The Chicago Gathering of Radicals This Week Has a Big Task Ahead of It

THE failure of an attempt in 1920 to bring about a political working agreement among the farm organizations, the Socialists, the Communists and the labor groups has not discouraged the men who made it.

The attempt is to be renewed this year, with a view to action in the congressional elections. A lot of radicals, near-radicals and liberals are to meet in Chicago this week to see if they can find a common platform.

John L. Lewis, president of the International Mine Workers, has agreed to be president, and so has W. S. Stone, of the Brotherhood of Locomotive Engineers, and W. S. Carter, of the locomotive firemen's brotherhood.

OUT AT LAST

A MORE sensitive man than Judge Landis would have resigned from the Federal bench as soon as he accepted the post of general manager of the Federal Coal and Oil Administration.

SHORT CUTS

The mercury, like the rest of us, has its ups and downs. The President's favorite text is, "Blessed is the peacemaker."

AN APOSTLE OF CHAOS

HAD Alexander Howat, stormy petrel of the United Mine Workers of America, been successful in his attempt to stamper the Indianapolis convention against John L. Lewis, president of the miners' federation, the country might have looked for something more than an anthracite strike on April 1.

THE DELAWARE JUDICIARY

The Delaware judiciary has declared constitutional a law enacted by the last Legislature requiring every man and woman to pay a filing fee of \$3 whether or not such person is subject to an income tax.

used to act with the insurgents from regions further south in this State. The narrowness of his escape shows clearly the drift of feeling and sentiment among the workers who are asked to accept further reductions in a wage scale which is now far from adequate in the widening areas where mines operate on part time when they operate at all.

AS ONE WOMAN SEES IT

Work Done by the Travelers' Aid Society, With Some Little Side-Lights on the Stranger in Town on Sunday

I AM always making vows that I will not go to another public luncheon or dinner to hear speeches about a cause spelled with big letters and then go home with a personal reason I am beguiled and find myself seated facing another broiled chicken.

A good many years ago I was at the organization meeting of the Travelers' Aid in this city, and a great and good friend of all needs travelers and a good traveler herself, Mrs. William Shaw Stewart, presided at that meeting and was instrumental in bringing the whole idea before the responsible people of the town.

A GENTLE HINT

NOW MY IDEA IS THIS!

Daily Talks With Thinking Philadelphians on Subjects They Know Best

DR. EMERY R. JOHNSON

On Scholastic Business Training

MODERN commercial education is now universally accepted as a requisite for the highest possible development of business ability, says Dr. Emery R. Johnson, dean of the Wharton School of the University of Pennsylvania.

THE SECOND LINE

The second line of development has naturally been toward a more definite specialization both in the method and the content of the courses taught. Collegiate schools of business at the present time are going through the period that the schools of engineering and of the applied sciences went through a decade or more ago.

SPECIAL GROUPS ENCOURAGED

The student is encouraged to enroll at the close of his freshman year in the specialized group which will give him the studies in the subjects which have the greatest and most important bearing on the particular line of business which he intends to enter.

RESEARCH WORK REQUIRED

In order that these ideals might be the more fully and systematically attained in the Wharton School it was decided about a year ago to require of every student as a condition of graduation the performance of a subject as to the completely ascertain the fact in the case under consideration and then correctly to appraise the fact obtained.

HUMANISMS

BY WILLIAM ATHERTON DU PUY

THE biggest moment in the life of Dr. Alexander Graham Bell, inventor of the telephone, developed in this way.

He had been working diligently for years trying to talk with a wire. It was a two-man job, for there had to be somebody at the other end. So some friends of his had hired an electrician named Watson to help him.

Finally, one day, young Bell said over the wire: "Mr. Watson, come here, I want you." And what do you think? The door opened and in stepped the electrician. The big thing had happened. He had heard and understood.

Thomas G. Gardine is a geographer for the Government, and as such goes snooping around in isolated places. One summer he was on Copper River in Alaska making maps, and was climbing around the ledge of a precipitous cliff.

THE INDIFFERENT ELIMINATED

The indifferent and the careless students are eliminated by the severity of the work, and only those finish the course who are able to make the most of themselves and are willing to work hard to accomplish this result.

WHAT DO YOU KNOW?

1. Who is President of Mexico? 2. What is a tract? 3. What is the nickname of New Haven? 4. Name the author of "The Scarlet Letter." 5. Distinguish among Richard, Richard, and Richard.

ANSWERS TO SATURDAY'S QUIZ

1. The Premier of Czechoslovakia is Dr. Edward Benes. 2. "Curran" is derived from Corinth, the ancient source of the fruit. Up to a century or so ago the spelling was "currants."
